Tipasa®

Lending workflows

Rick Newell
Senior Product Trainer
OCLC

Learning objectives

- Decide how you will use lending priorities and advanced lending workflows
- Process lending requests for loans and copies
- Print pull slips/packing slips and shipping labels
- Transmit scanned copies via Article Exchange

What are lending priorities & advanced lending?

Suggested uses for Lending Priorities

Consider Lending Priorities if:

- Your library is a member of a consortium
- You need to give priority to in-state requests
- Your library has reciprocal agreements with other libraries
- You want to give special handling to requests from libraries that are on your courier service

Suggested uses for Advanced Lending Workflows

If your ILL lending or document delivery operation has:	**Consider these Advanced Lending Workflows**
Several full-time staff; several student or part-time workers	VRSP
One full-time staff; several student or part-time workers	RSP
One full-time staff; one student or part-time worker	R
One staff member who does all ILL lending activities or document delivery; no student or part-time worker	none

Verifying, **R**etrieving, **S**canning, **P**ackaging

Things to know

- You can configure up to 5 priority lending queues
- Verifying, Retrieving, Scanning, and Packaging queues:
  - Requests move between these queues only as the result of staff action
  - Moving a request into one of these queues does not stop request aging or change Days to Respond
  - These queues are also available in Lending Priorities and Document Delivery, if enabled

Tipasa

Last updated: Feb 2, 2018

Tipasa provides new functionality that speeds fulfillment of interlibrary loan requests to save time for your staff and users.

For implementation materials, please see Tipasa Implementation.

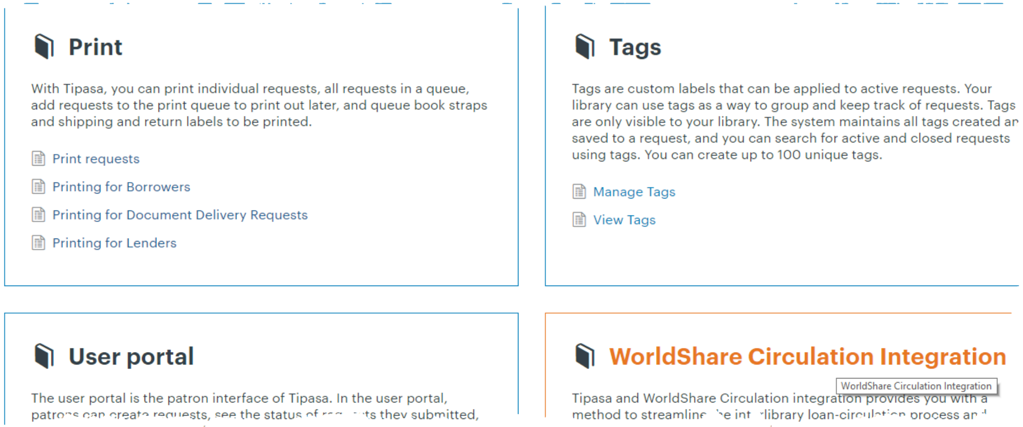
Get started

Get started with Tipasa.

- Contact OCLC Order Services
- Creat~ Tipasa account

Article Exchange

This guide provides an overview of product features and rela technologies. In addition, it contains recommendations on b practices, tutorials for getting started, and troubleshooting i for common situations.



Print

With Tipasa, you can print individual requests, all requests in a queue, add requests to the print queue to print out later, and queue book straps and shipping and return labels to be printed.

- Print requests
- Printing for Borrowers
- Printing for Document Delivery Requests
- Printing for Lenders

Tags

Tags are custom labels that can be applied to active requests. Your library can use tags as a way to group and keep track of requests. Tags are only visible to your library. The system maintains all tags created ar saved to a request, and you can search for active and closed requests using tags. You can create up to 100 unique tags.

- Manage Tags
- View Tags

User portal

The user portal is the patron interface of Tipasa. In the user portal, patrons can create requests, see the status of requests they submitted,

WorldShare Circulation Integration

WorldShare Circulation Integration

Tipasa and WorldShare Circulation integration provides you with a method to streamline the interlibrary loan-circulation process and

Thank You!

When you exit from Webex, you will automatically be directed to an evaluation form:

- **Instructor**: Rick Newell
- **Class name**: Lending Workflows

Training questions (what’s covered in a class, etc.)?

Contact Rick Newell

newellr@oclc.org or 1.800.848.5878
